

## A visit from ZooLab at Hengist Field Care Home

On Friday 12 January we had a fantastic visit from ZooLab at Hengist Field Care Home, who came with an interesting selection of animals for our residents to touch and feel, hold or stroke if they wished.

*Established in 1997, ZooLab is a family-run business, supported by a fantastic group of passionate field presenters and support staff who enthusiastically share their love of nature with audiences of all ages. Offering both face-to-face and online animal experiences.*

The young man from ZooLab spoke about each animal in turn, telling us all the information about them, their habits, ways of life and plenty more.

We were introduced to **a snake, a large cockroach, a giant snail, frog, scorpion** and **gerbil**. The scorpion even shone bright blue under the fluorescent light!

*What a fascinating afternoon – thank you ZooLab!*
