

Easter activities at Hengist Field Care Home

We had a very productive morning here at Hengist Field Care Home on Friday 25 March. We got our Easter activities well and truly underway.

Some of our residents took part in a brilliant but very simple activity that promotes hand to eye coordination; they decorated Easter trees using small plastic eggs on ribbons.

Our residents needed to hook the eggs onto the tree, which for some of them took huge amounts of concentration. Those unable to physically participate were still involved by choosing colours and telling us where to put the eggs for them.

Well done to them all for trying.
