

Interactive companion dog at Hengist Field Care Home

Our lovely Vera at Hengist Field Care Home received this adorable Interactive Companion Dog from her niece Jane in Hong Kong this week.

Vera loves it! The amazing dog wags its tail, barks and moves its head. It also reacts to noises if you pat his head or clap.

Our residents in the lounge were cooing and ahhhing at the new arrival – many wanting one for themselves, including our staff!
Something to add to all our Christmas lists!

What a wonderful gift for Vera, which has brought so much joy and fun.
