

## Magic Table fun at Hengist Field Care Home

On a regular basis, we encourage our residents on our Dementia Unit at Hengist Field Care Home to enjoy a session on their amazing Magic Table - an interactive table full of fun and engaging sensory displays to interact with.

Different activities are added to the Magic Table to keep our residents interested; they particularly enjoy **sweeping away leaves** and **touching stars** to make them shoot across the table.

Other engaging displays include **fish swimming** and **flowers which go into bloom** when you touch them – *so relaxing!*

**Sensory tools** like this are so important for those living with **Dementia** on our Unit, offering something simple and stimulating to focus on and enjoy.

Enjoying the relaxing sensory displays
