

## Making friends with Zoolab creatures at Hengist Field Care Home

**On Monday 17 February we had a visit from Zoolab, which our residents were both excited and curious about.**

**Zoolab** are a company that provide hands-on animal encounters and when the young lady from Zoolab arrived she brought out her array of interesting creatures one by one.

Like Noah from the Ark, she had with her a **snake**, a **tarantula**, **two rats**, a **hissing cockroach**, a **giant land snail** and a **gecko lizard**. All so different and very interesting to observe.

Our residents could, if they wanted to, handle or touch the animals, or just look at them.

A fascinating afternoon was had admiring and touching the creatures and the **Zoolab** team member provided lots of interesting facts about all of them.
